PROFESSIONAL SUMMARY

Final-year BICT student specializing in AI, Machine Learning & Generative AI with hands-on experience building AI pipelines, RAG applications, and scalable backend solutions. Skilled in Python, FastAPI, LangChain, vector databases, and cloud deployment (AWS/Azure). Passionate about building practical AI systems that deliver real impact.

TECHNICAL & PROFESSIONAL SKILLS

- Programming:** Python, SQL
- GenAI/LLMs:** LangChain, OpenAI/Gemini APIs, Hugging Face, RAG, Prompt Engineering, AI Agents
- Libraries/Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow
- Backend & APIs:** FastAPI, REST APIs, Flask, caching strategies
- Databases:** PostgreSQL, MySQL, vector databases
- DevOps & Cloud:** CI/CD(GitHub Actions), Docker, AWS, Azure
- Tools:** Git/GitHub, VS Code, Jupyter, Google Colab
- Web:** HTML, CSS, JavaScript
- Soft Skills:** Leadership, Communication, Teamwork, Problem Solving
- Languages:** English (Fluent), Tamil (Native), Sinhala (Basic)

EXPERIENCE

- Backend Developer - Sparta Capital (PVT) LTD - Remote**

Sep 2025 – Present

 - Develop scalable backend services with Python (FastAPI) and PostgreSQL focusing on reliability.
 - Build and integrate GenAI application components and prompt workflows to support internal tools.
 - Collaborate on API design, modular architecture, and containerization to enhance system robustness.
- Online ICT Tutor - EDUS Online Institute – Remote**

Jan 2025 – Sep 2025

 - Taught ICT to English-medium students (Grade 6–O/L).

PROJECTS

- UOV AI Assistant – RAG-Based Chatbot | [GitHub](#) | [Live Demo](#)**

Feb 2026

 - Built a RAG chatbot to answer domain queries using FastAPI, Streamlit, and Qdrant.
 - Added response caching, streaming, and voice input to improve performance and usability.
 - Deployed using Docker and GitHub Actions CI/CD to Hugging Face Spaces.

Tech: Python, FastAPI, Streamlit, LangChain, Qdrant, Docker, GitHub Actions, LLM APIs
- AI-Powered Lead Generation & Outreach Agent | [GitHub](#) | [Live Demo](#)**

Jan 2026

 - Built an automated system that finds and qualifies B2B leads from job postings with LLM scoring.
 - Designed FastAPI endpoints and stored lead data in PostgreSQL with OpenRouter LLM integration.
 - Implemented personalized Gmail SMTP outreach with dry-run support and GitHub Actions CI/CD.

Tech: Python, FastAPI, LangChain/OpenRouter, Supabase/PostgreSQL, Docker, GitHub Actions, SMTP
- Fraud Detection MLOps Pipeline | [GitHub](#) | [Live Demo](#)**

Oct 2025

 - Built an end-to-end fraud detection pipeline with data preprocessing and model threshold tuning.
 - Developed a FastAPI inference service for real-time and batch predictions with MLflow tracking.
 - Containerized with Docker and deployed CI/CD workflows to Hugging Face Spaces.

Tech: Python, Scikit-learn, XGBoost, MLflow, FastAPI, Docker, GitHub Actions, Hugging Face Spaces

EDUCATION

Bachelor of Information & Communication Technology (Hons)	Apr 2022 - Present
University of Jaffna, Expected Graduation: 2027 GPA: 3.5/4.0	
Diploma in English	Jun 2024 - Sep 2024
SLEGA College	

CERTIFICATIONS

Agentic AI System Design for PMs - Maven , Nov 2025 (View Certificate)	
Data Science, Machine Learning, Deep Learning & NLP Bootcamp - Udemy , Mar 2025 (View Certificate)	
Data Science Foundation Professional Certificate - IBM (via edX), Dec 2023 (View Certificate)	
Machine Learning with Python: A Practical Introduction - IBM (via edX), Dec 2023 (View Certificate)	

EXTRACURRICULAR ACTIVITIES

Volunteer, Yarl IT Hub	Jan 2025 - Present
Member, Student Union	Jan 2023 - Jan 2024
Member, IEEE Student Branch	Feb 2023 - Feb 2024
